Services

Training and
Certification

I am a self-taught programmer with a master's degree in psychology (from Gdańsk Univeristy). My main interests are marketing and management. Every day I keep looking for new ways to use psychology in programming. My motto is: every technology is just a tool. You can be a master at using a hammer but if you need to drive a screw you should consider learning the proper tool

WORK EXPERIENCE

The Software House

(August 01, 2023 - Present)

NodeJS Developer

Backend developer in greenfield project which is responsible for comparing products. Main technologies TypeORM, ExpressJS, TypeScript and PostgreSQL

The Software House

(May 01, 2023 - July 31, 2023)

NodeJS developer

Had the occasion to work for a short time on a data warehouse project which is fully on AWS. The most important thing that I was responsible for was reworking the way of authentication and authorization with the usage of the self-hosted IAM service keycloak, between multiple internal projects. Apart from that had to make some small improvements in data-importing workflows. Main technologies: typescript, AWS Step Functions, S3 and PostgreSQL

The Software House

(April 02, 2022 - May 01, 2023)

Fullstack developer

I'm responsible for a legacy application that we inherited from a previous company. The application is a CRM with NodeJS and PostgreSQL database on the backend and React with NextJS on the front end. I worked as a full-stack developer dealing with issues related to both frontend and backend. The application has plenty of integrations with external services for invoicing, signing documents, fetching customer company data and integration with self-hosted IAM called fusionauth. Main technologies: React, Express, GraphQL, NextJS and PostgreSQL

DIR

(January 10, 2018 - March 31, 2022)

Web Developer

Developing and maintaining web applications related to call centers. Apps were responsible for calculating statistics of calls eg. call duration, which app user answered most calls, how long did it take to answer calls, etc. It was also possible to create users vel Agents and manage them, add them to call center queues, give them priority with calls, etc. For the major part of my time. Main technologies: PHP, JavaScript, and Perl. And from time to time with Python or Ruby by using Ruby on Rails.

EDUCATION

University Of Gdansk

(October 01, 2015 - October 01, 2020)

Masters, Psychology
